CP8854 series

Unique cordless impact wrenches for tire changing and quick service applications for light vehicles

2-in-1 unique technology offers the lightweight and compact performance of an air impact wrench in a cordless tool.

Tire shop customers use air tools because they need high performance... but this limits mobility and flexibility.

THAT IS WHY WE HAVE DESIGNED THE CP8854

Combines the performance of a Twin hammer mechanism with the advantages of an advanced brushless electric motor.

Main Industries

For any

Passenger cars

Pickup trucks

Vans

SUV

○ High productivity

Unique in its class, the CP8854 packs the same performance as an air tool, but offers the mobility advantages of a cordless tool.

High performance

774 ft.lb / 1050 Nm
Torque in reverse
4500 RPM
2 X higher than a
standard impact wrench

No more hand tightening

Snugging approach
function

No more overtightening

88 ft.lb / 120 Nm
Shut-off position
in forward

Extended mobility

18 V/2.5 Ah - 45 Wh
High power, compact
size, 250 cycles before
the battery requires
changing

○ Ergonomics, comfort and safety

The lowest vibration and noise levels in its class.

Low noise level

Sound pressure
at 87 dB(A)
25% quieter than a standard
impact wrench*

Low vibration level

Vibration at 9.3 m/s²
25% better comfort than
a standard impact wrench*

Lightweight

5.51 lbs / 2.5 kg
25% lighter than a
standard cordless
impact wrench*

Compact

7.44 in / 180 mm
20% smaller for great
maneuverability*

First on the market!

Twin hammer mechanism with an electric brushless motor.

This unique 2-in-1 technology combines the best features of air tools with the mobility advantages of cordless tools.

- ✓ Compactness
- ✓ High durability
- ✓ Performance
- ✓ Easy and quick greasing of the twin hammer

OEM

The CP8854 solves my tire fitter's challenges!

Tire technicians demand more cordless tools for their daily jobs but until I discovered the CP8854, I had not been able to find a solution that could offer compact and lightweight performance with low vibration and noise levels!

Workshop manager

Tire shop

Control and secure tightening to ensure process quality in the field!

Thanks to the built-in shut-off feature there is no risk of overtightening, giving me peace of mind.
